PROFILE

I am a second-year B.Tech Computer Science Engineering student at SRM Institute of Science and Technology, Chennai, with a strong interest in full-stack development. I have hands-on experience working across both frontend and backend technologies, along with API integration, enabling me to build functional and user-focused applications. I am proficient in Python and have experience integrating Python with SQL for database-driven solutions. I am continuously seeking opportunities to enhance my technical skills, stay updated with modern development practices

TECHNICAL SKILLSET

- **Full Stack Development:** Experience building end-to-end applications with frontend, backend, and API integration
- **Backend Development:** Worked with Node.js to develop scalable server-side applications (e.g., Omni Search project)
- **Python Programming:** Strong foundation in Python for application development and problem-solving
- **Database Management:** Experience with SQL and relational databases for structured data handling
- **Python-SQL Integration:** Developed database-driven applications like a credit card management system and inventory management system
